

All systems come complete with full filter sets, remote controller, operation manual, 6 foot power cord, certified label and certificate of quality performance.

Standard 10 Individual Filtration Process and optional 5 Individual focusing solution Filtration Process

Filtration Process

All InnoClean Air Purifier with standard **10 Individual** Filtration Process:

GS Antimicrobial Pre-filter; Electrostatic Filter; Absorption Carbon Filter; TiO₂ Nano Photo-catalytic Filter; **IC Pro Cold Type** Nano Photo-catalytic Filter; 2 x 253.7nm UVC UV Lamp; 2 x **IC Pro** Nano Photo-catalytic Filter; **GS** Antimicrobial After-Filter and Anion Generation.

For different model and design, there will be additional focusing solution Filter for specific requirement, e.g. **IC Pro Nano-Silver** Antimicrobial Filter; **IC Pro** 20mm TRUE HEPA Filter – H13 (EN1822) Standard; Patented Electrostatic Precipitator; Patented **MnO₂ Honeycomb** Catalytic Filter and Patented **IC ChemPro** Catalytic Filter
