608 and 408 Series Air Purifier

Stay Air Pollution Stay Foolish Stay Gold

Don't forget the core value of air purifier is air purification efficiency and capacity.

Many invisible pollutions around in the air including fine dust, secondhand smoke (fine to 0.01 micron), bacteria, formaldehyde, TVOC, cigarette and pollen, etc. there are still many ... These pollutions will affect our health and reduce productivity, etc. Simply, air purifier aims to clean air you breathe.

Better than you expected.

MEDIAIR 608 & 408 ElectroMed air purifier is using electrostatic filter (Electro Chamber) to removes fine invisible air pollution. The 0.01 μm fine particles, smoke particles, bacteria and virus are electrically charged and then attach it to the earthed plates. These pollutions will be carbonized. The great benefit is electro chamber can be cleaned and reused.

MEDIAIR 608 ElectroMed's CADR is 639 m^3/h . The CADR indicates the volume of filtered air delivered by an air cleaner. Higher CADR ratings indicate that the air purifier will filter the air faster and powerful than an air purifier with lower ratings.

MEDAIR launched the latest series – 608 & 408 series air purifier. It is not just purified air.

Improving interactive and more effortless, MiotLink and we develop APP using IOT technology. User could be through their mobile to distance control their air purifiers and monitor indoor air quality.

Through MEDAIR App, user could monitor indoor air quality and take relevant and appropriate action in everywhere at all time.

More than one but one can control all

To simplify air purifiers' management, user can control MEDAIR air purifiers through MEDAIR app. No longer go to different locations where air purifiers located for controlling, checking and monitoring IAQ, etc. Using 'share' function to authorize other users manage air purifiers.

堅持設計原則 - 過濾空氣中污染物的能力

我們所呼吸的空氣中有許多看不見的污染物如微粒、二手煙 (細至0.01 微米)、花粉、致敏原、細菌、病毒、煙霧、甲醛及異味等。這些污染物都會危害到我們的健康，如何確保我們呼吸到潔淨的空氣？

MEDIAIR 空氣淨化器是一部專為過濾空氣中的污染物而設計，有效過濾空氣中懸浮粒子 (包括細至 0.01 微米的二手煙、PM2.5 及 PM10 等)、細菌病毒、有害物質及異味等，減少污染空氣為我們帶來健康的威脅。

比您想 更理想

MEDIAIR 608 & 408 ElectroMed 空氣淨化器採用高壓靜電過濾倉，高效過濾微細至 0.01 微米的微粒、煙霧微粒及花粉等，更可即時碳化 (殺死) 細菌病毒，只需清潔高壓靜電過濾倉，無需更換耗材，可永久使用。

MEDIAIR 608 ElectroMed 的潔淨空氣輸出率 (CADR) 為 639m³/h。CADR 指由空氣淨化器輸出的潔淨空氣量。CADR 數值越高，則表示其真正使用範圍越大。
